The **flexible/curved** LED Panel series uses polymer nanotechnology materials, design based on a reliable and solid technology. We can supply any size of modules in order to fulfill any special requirements.

The new curved LED Modules are perfect solution for constructing smart, creative LED display systems with the ability to adapt to structures.

A unique rubber based magnetic flexible modular LED screen is designed and manufactured for indoor application.

Using our flex LED screen technology, we can create a unique led video display solution such as a circular column, curved, waved shape LED screen. Imagine the endless messaging, branding and advertising opportunities unlocked by the ability to wrap static columns, curved or waved wall in convention centers, stadiums, shopping centers, and more with seamless, brilliant imagery never before has there been such a LED display solution.

IMEN MOOJ[®]

Provide visual advertising equipment and Lighting solutions

Fast Maintenance

With front maintenance design, maintenance efficiency is 10 times higher than traditional method, significantly saving time needed for maintenance.

Super Light and Thin

10.8KG / panel with a depth of 89 mm which is half of the depth of traditional LED screen, saving space and transportation cost.

Noiseless

Free of fans and air conditions, excluding noise and reducing power consumption.

Fine and Smooth Picturing

Drive IC of high refresh rate and high grey scale to ensure stable picture and better visual effect of the screen. The latest horizontal-blanking circuit applied to completely eliminate phenomenon of blanking and smear.

FLEXIBLE CURVE LED DISPLAY

Flexible Soft LED Display can be used for curve, concave, round, S-shape and irregular shape. It has 16mm, 20mm, 25mm. Its single module dimension is 160mm (H)*220mm(W). Most soft design helped user to apply in the fashion stores, hotels, exhibitions, shopping mall or even show booths. Ultra-light weight allow people to carry and install it great quickly. Since it is super thin design, customers can store and move it through flight cases in the soonest time. It is hence that save labor cost as well as the storage space

Scale of Module

20.6 cm (W) * 12.8 cm (H)

22 cm (W) * 16 cm (H)

19.2 cm (W) * 19.2 cm (H)
